Except as expressly provided herein, no part of this Owner's Manual and Reference Guide is comprised of If you should encounter any difficulty, title, ownership rights and intellectual property rights in and to the Software. These Information limits are designed to provide more reasonable protection against harmful interference in a residential installation, and are more stringent than "outdoor" requirements. Operation of this device is subject to the following conditions: 1. This device may not cause harmful interference, and 2. This device must accept such interference. For safety, always use a combination of governmental and private data sources, which we identify as required in product literature and copyright messages displayed to the consumer. Virtually all data sources contain inaccurate or incomplete data to some degree.

This is particularly true for alkaline or NiMH batteries. Start Up see page 57 for setting the battery type that may be used. Stored data is not lost when batteries are removed. Important Note: When replacing batteries, use only new or fully charged batteries. Do not mix alkaline and NiMH batteries. Recharge 1. Remove the battery. Thereafter, if you haven't moved more than 600 miles from your original location, it takes only seconds to minutes. In order to receive satellite signals, you must be outdoors. Map Item Details: If, for any reason, you have difficulty. When navigating a route, the Active Route Page also displays. To view each Main Page: 1. Press and release the PAGE key, repeatedly, to cycle through the pages. 2. With a Page displayed, press the MENU key to display the list of options for that page. Power On Page: Satellite Page Trip Computer Page Map The Battery Power icon displays the remaining power as the battery becomes depleted. Battery Power Acquiring Satellites Backlight is On Alarm is On The Map Page displays a detailed map of the area surrounding your current "North Up" orientation. It allows you to pan the map with the ROCKER key as well. Mode as view your progress when navigating. When in the "Track Up" mode with Map oriented in the direction of travel, a north reference arrow appears at the oriented with top left corner to orient the map. When Press and hold to Zoom the map scale rapidly. The map scale in the lower left hand side of the display is shown in units of measurement selected in the "Units". If you zoom in so far that Zoom In Zoom Out the result. Used Very Good May show minor signs from normal use. Note: Garmin may no longer provide support for map updates on this product since it is discontinued. Please try again. Please try again. Please choose a different delivery location. In order to navigate out of this carousel please use your heading shortcut key to navigate to the next or previous heading. Please try your search again later.

Central to the device is its high-resolution, highly reflective, 256-color TFT display and LED backlight, implemented so you can navigate in either broad daylight or complete darkness, as your schedule dictates. The unit retains the overall sleek and easy-to-use design of earlier generations of the GPSMap 76 family, including its rugged, buoyant, waterproof housing. Map page. View larger. Compass page. View larger. Tide prediction page. View larger. The GPSMap 76CS packs loads of features into a compact, marine GPS device. View larger. The compact unit also boasts a 13 MB Americas marine basemap that includes tide data. In addition, an impressive 115 MB of internal memory lets you load optional MapSource BlueChart or Recreational Lakes with Fishing Hot Spots marine cartography. The award-winning BlueChart features depth contours, intertidal zones, wrecks, and navigational aids, while Recreational Lakes includes fishing areas, boat ramps, marinas, and hazards for more than 1,000 popular U.S. and Canadian lakes. You can rely on the 76CS when you're navigating the highways and byways in your rudderless vehicle, too, thanks to a built-in, autorouting basemap of major interstates and highways. When loaded with optional MapSource City Select detailed street

cartography, the GPS provides automatic route calculation to millions of addresses or points of interest, complete with turnbyturn directions and tone alerts. The unit is also compatible with MapSource U.S. Topo and 24K Topo for offroad excursions. Loading charts or maps is faster than it was with earlier generation devices, too, thanks to the 76CS's USB interface. Navigation instructions can be shared with repeaters, plotters, and autopilots using NMEA protocols through a dedicated serial port.

Other features include a builtin quad helix antenna with remote antenna capability; 1,000 user waypoints with name and graphic symbols; 50 reversible routes; a 10,000point automatic track log; 20 saved tracks so you can retrace your path in both directions; audible alarms for anchor drag, arrival, offcourse, proximity waypoint, and clock; and a trip computer that provides, among other things, an odometer, stopped time, moving average, overall average, total time, and max speed. Battery life using 2 AA alkaline batteries is rated at 20 hours typical use. The 76CS is waterproof to IEC 60529 IPX7 standards submersible to 1 meter for up to 30 minutes. To calculate the overall star rating and percentage breakdown by star, we don't use a simple average. Instead, our system considers things like how recent a review is and if the reviewer bought the item on Amazon. It also analyzes reviews to verify trustworthiness. Please try again later. A. H. Keach 4.0 out of 5 stars It is a great little GPS for that purpose and I'm sure it's equally good for hiking. There are a lot better choices for auto navigation but I'm totally happy with it for my purpose. I was initially quite skeptical that a handheld's small screen real estate could be useful as a chart plotter. Nonetheless, I purchased and installed the Blue Chart Americas CD and activated the Caribbean charts. After 2 weeks of constant use sailing in the Windward Islands, I'm astounded at how well it works. With the declutter mode engaged, the screens show an appropriate level of detail and the display has excellent visibility in direct sun. Although the backlight is adequate for viewing in bright conditions under a boat's bimini, I found that I actually preferred to hold it out in the direct sunlight. I particularly like the ability to customize the paging sequence and the autozoom feature is handy as well.

There is nothing intuitive about the interface but after I got over the learning curve, I was surprised how quickly I could get to the info I needed. If you plan ahead, you can enter them on a PC and download them. The battery life is about as advertised and you can really stretch it by turning it off and on as you need it because it gets a fix in about 15 seconds if you haven't moved too far. Highly recommended! Seadoo designed special glove boxes to flush mount one of these units due to their superior waterproof ability to handle the wet environment experienced in skiing. However the City Navigator software coupled with the portable GPSMAP series provides an even more incredible combo worth far more than the dedicated units in my opinion. Overall it is very easy to transfer tracks from the unit to record fishing drifts and plot waypoints and routes on your computer for download into the GPS handheld. Instead of printing google maps, I use the mapping software to create waypoints and routes to all my destinations. Easy enough, check the item before shipping it to make sure it works. Wasted time another method was purchased I find it very useful navigating my local coastal waters. Of course a big screen would be better, but then it would not be portable. Enjoy using this for maps. For more current recommendations, please refer to our handheld GPS buyers guide or our Garmin handheld GPS comparison chart. An ideal unit for boaters, the 76CS floats and is waterproof, and comes with an Americas marine database that includes navigational aids. Here's the lowdown on the differences. The 76 and 76S have black and white screens, while the 76C and 76CS are color. The 76 has 8 MB of memory, the 76S has 24 MB, while the 76C and 76CS both have 115 MB of memory. Units with an S have an electronic compass and barometric altimeter, while the C units, in addition to color screens, have turnbyturn routing capability. Finally, the 76CS has recently been updated with the new 76CSx.

Fortunately for you, GPS Information.net offers their usual complete treatment with this review of

the Garmin 76CS. Use this handy Garmin GPS comparison tool. Connect with him on Twitter, Facebook or Google Plus. The Canyon Country of Southeast Utah.
